DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/23/2007 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 20-24 and 33-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20 recites "a plurality of wall portions" and later recites "a first wall portion" and "a second wall portion". It is not clear if the first and second wall portions are part of the "plurality of wall portions" or if they are additional portions.

Claim 33 recites "means for directing air from the air supply system to both the purge chamber and the supply or service chamber". The original disclosure fails to support this particular means language, making it unclear as to which structure

Art Unit: 3683

corresponds to the means recitation and difficult to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph.

Claim 34 recites "means for passing air out". There is insufficient antecedent basis for this limitation in the claims.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 33-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Thomas (US# 6391098).

Thomas discloses all the limitations of the instant claims including; means 26, 46 for defining a supply or service chamber 48 and a purge chamber 50 in said reservoir; a passage (through 38, 42 and 52) extending through said purge chamber, said passage further including a port at a first end of the passage and an opening (in 46) in a second end of the passage for establishing fluid communication between said supply or service chamber 48 located at the second end of the passage and the air supply system located at the first end of the passage; a delivery valve 52 in said passage; means (for instance, 36, 52) for directing air from the air supply system to both of the purge chamber and the supply or service chamber, whereby the means for directing air is located in the passage extending through the purge chamber.

Allowable Subject Matter

Claims 25-32 are allowed.

Claims 20 and 22-24 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Response to Arguments

Applicant's arguments filed 4/23/2007 have been fully considered but they are not persuasive. Regarding claim 33, the claims do not clearly define and passage member. Note the rejections above.
